

## How to get MyMaths to work on an iPad or iPhone.

You will need your iTunes login and password details.  
It is also recommended you have your mymaths login details.

- 1) Go to the App Store on your device.
- 2) Search for 'Puffin Academy' and download it. This is a free app.
- 3) Once Puffin Academy has downloaded, open the App.
- 4) Click the blue icon to open the puffin academy portal.
- 5) Search for 'mymaths' in the search bar, this can be located at the top right hand side of the screen.
- 6) Select 'mymaths'. You should then see a screen that contains a description of mymaths.
- 7) To the right of the mymaths icon you should see the option to launch or install mymaths. Click install to install mymaths into the puffin academy app. Once installed you should be able to open mymaths inside the Puffin Academy app. Mymaths should then work as it does on a Windows PC.
- 8) To use mymaths in future, simply load up the Puffin Academy app and click on the mymaths icon. If the mymaths login in screen is not displayed, repeat steps 4 – 6.
